I am a dedicated mobile app developer, backend developer, and software engineer with a passion for transforming ideas into tangible, impactful solutions. I am committed to continuous learning and effective collaboration, with a strong focus on detail and quality. I strive to stay current with modern technologies, contribute meaningfully to team efforts, and continuously grow my technical and problem-solving skills in today's fast-evolving tech landscape.

EDUCATION

Bahir Dar Institute of Technology (BiT) – Bahir Dar, Ethiopia

Oct 2021-2026

B.Sc, Software Engineering

Bachelor of Science in Software Engineering

GPA: 3.92/4.00

Relevant Coursework: Data Structures & Algorithms, Communication Skills, Competitive Programming, Project Development

EXPERIENCE

Backend Developer Intern

Helder Technologies, Addis Ababa, Ethiopia:

Mar 2025 – Present

- I am actively engaged in the development of a scalable and secure backend API tailored for a variety of web applications using Laravel. My responsibilities include designing database schemas, implementing RESTful endpoints, and integrating authentication features. I also work with deployment tools and version control to maintain production-level code.

Node.js & Frontend Intern (Bootstrap)

Roshan Hub, Addis Ababa, Ethiopia :

Aug 2024 – Sep 2024

- I contributed to the frontend design and backend functionality of a business portal using Node.js and Bootstrap. I helped build responsive user interfaces and handled API integrations. My focus was on enhancing the user experience while maintaining code quality and performance.

Prodigy Info Tech, India

Jul 2024 – Aug 2024

- I was involved in the development of mobile applications using Flutter and Dart, where I implemented features such as user authentication, state management, and real-time data syncing using Firebase. This internship provided me with hands-on experience in building and optimizing production-ready mobile apps while collaborating with a remote team.

TECHNICAL SKILLS

Programming Languages: Dart, JavaScript, Java, C++, HTML, CSS

Frameworks / Technologies: Flutter, Laravel, Node.js, React, MySQL, MongoDB

Databases: PostgreSQL, MySQL, MongoDB

Tools / Platforms: Git & GitHub, GitLab, Firebase, cPanel, phpMyAdmin, GitHub Actions, Netlify, Trello, VS Code, IntelliJ IDEA, Android Studio, Postman.

SELECTED PROJECTS

Dr. Eyob Mamo Online Learning Platform

- Built a psychological course-selling website using Laravel, MySQL, React (TypeScript), and cPanel.
- Integrated secure online payments.

Pittards E-commerce Website

- Created an online leather product store for men, women, and kids using Laravel, React (TypeScript), and MySQL.
- Enabled payment gateway and product categorization.
